

EBM Avenue

Eco-friendly Blockchain Mining

Vision

In the area of cryptocurrency mining, we'd like to revolutionize the industry, combine cutting-edge technology, sustainable practices, and community-driven initiatives to create a more efficient, profitable, and inclusive mining ecosystem.

At present, some of the challenges faced by the crypto mining sector include energy consumption, internet bandwidth, hardware limitations and market volatility on top of none to limited profits through use of cloud mining platforms. Nonetheless, we are optimistic about a future where crypto mining will be seen as not only being profitable but also conscious of the environment around it, with better technology in place and socially responsible as well.

As a forward-thinking company dedicated to advancing eco-friendly cryptocurrency solutions and promoting clean energy, we believe that businesses must play a leading role in shaping a sustainable future for all.

Our vision goes beyond classical approaches to mining; instead, we intend to enable individuals to take part in this green mining initiative and benefit through holding and staking tokens for crypto discounts and rewards while supporting various global UN initiatives. And to promote 100x crypto adoption and widen utilities we are open for business partnerships to promote crypto utility and \$EBM value as the all-time best crypto currency to buy.

Through partnering with other decentralized exchanges, working closely with key players in the industry and embracing regulatory clarity, we want ourselves established as one of the thought leaders in DeFi and crypt space driving innovation growth among others positive changes within this sector.

It is a well-known fact that decentralized blockchains i.e. blockchains based on Proof of Work (PoW) consensus algorithms like Bitcoin has taught us how to be decentralized. What we see is not just about cryptocurrency miners but shaping future decentralized finance empowering communities creating a sustainable rich ecosystem that benefits everyone involved.

Join us now on this transformative journey through exploiting possibilities found within crypto space with sustainable practices to support crypto reputation and wider adoption while lighting up brighter connections to empower DeFi Community.

\$EBM Position

Our company is strategically positioned to capitalize on THE dynamic and ever-evolving cryptocurrency market offering a multitude of opportunities for innovative projects to thrive by mining a diverse range of cryptocurrencies, including established coins like Bitcoin (BTC), Bitcoin Cash (BCH), Ethereum Classic (ETC), Monero (XMR), RAVEN (RVN), Kaspas (KAS) and emerging technologies such as BlockDAG (BDAG).

BlockDAG, with its directed acyclic graph structure, represents a paradigm shift in blockchain technology. By enabling parallel processing of transactions and multiple block additions simultaneously, BlockDAG offers enhanced scalability, faster transaction speeds, and increased efficiency in mining operations. As an early adopter of BlockDAG, our company stands to benefit from its innovative approach and the potential for significant growth in the cryptocurrency mining sector.

The integration of BlockDAG into our mining operations not only diversifies our portfolio but also positions us at the forefront of technological advancement in the crypto world. Leveraging our state-of-the-art facilities and efficient devices, we are committed to maximizing revenues and profitability while staying ahead of market trends.

Combining state-of-the-art technology with effective and sustainable approaches towards DeFi utilities and strategic tokenomics makes \$EBM's strong and token holders alike. This strategic combination of cutting-edge technology, diverse coin mining, and discount and rewards-sharing initiatives sets us apart in the competitive crypto landscape.

This way, we signify our open business strategy and show again how much we value our investors' trust. Our continued focus on mining multiple cryptocurrencies, leveraging advanced technology and establishing investor partnerships helps us remain at the forefront of growth and leadership in fast changing digital economy.

Join us in this fulfilling journey - where every step leap towards a better world.

\$EBM

Enter the future of decentralized crypto mining and income. Being a supporter and ally of the United Nations Global Compact (UNGC) principles, advocating for responsible business practices in line with global sustainability goals, we aim to change the game of cryptocurrency mining by utilizing hi-tech, artificial intelligence optimization, renewable energy sources, and strategic tokenomics.

We are focused on constructing and operating Crypto farms in various countries with the objective of enhancing mining efficiency and profitability as well as offering creative benefits to presale buyers and \$EBM token holders.

In a rapidly evolving digital economy, secure and sustainable crypto mining operations are in high demand to boost blockchains' performance. Eco-friendly mining operations with strategic token utilities puts \$EBM apart in Crypto space giving more reputation and adoption.

Combining state-of-the-art technology with effective and sustainable approaches towards DeFi utilities and strategic tokenomics makes \$EBM's strong and token holders alike.

We have opened an Initial Token Offering (ITO) through our presale, to invite you join us in this exciting journey towards a more efficient and sustainable future of crypto industry. It may look like a dream today, but this commitment is going to be backed by introduction of our Interest Free Loans, Swap4Less, Stake4More programs where each EBM token leaps towards various benefits and rewards

Join us today on this path-breaking mission into new era of Decentralized Finance and investments through EBM Avenue. Let's tap into full potentialities of blockchain technology as we shape the landscape of decentralization finance tomorrow.

Market Analysis

The global cryptocurrency [mining market](#) has exhibited remarkable growth, with a market size of USD 1.92 billion in 2022, projected to reach approximately USD 7 billion by 2032, at a robust CAGR of 12.90% from 2023 to 2032.

Considerable growth opportunities in developed and developing markets: Emerging markets including China, India, Brazil; and developed countries like the US, Germany and Japan are anticipated to have a great growth potential in the cryptocurrency industry. As an example, Brazilian Cryptocurrency companies have entered into an agreement by 2020 to legalize and enhance the adoption of digital currencies in their country. Many big bitcoin firms from Brazil were also among those that have signed this pact thus underlining its market potential.

Different sectors embracing virtual currency: Some retail and e-commerce businesses have introduced bitcoins as an alternative payment mode. For instance, Burger King in Germany has accepted Bitcoin for online purchases and deliveries. Eventually, cross-border remittances are likely to be influenced while banks will be forced to accommodate digital money.

Regional market trends: In 2022 North America had the highest share of global cryptocurrency market but Asia-Pacific (APAC) is expected to register a higher CAGR value growth during the forecast period with China leading the regional market due its low electricity costs coupled with existence of numerous mining entities.

\$EBM Roadmap

Our roadmap is a strategic blueprint that guides our project's development, growth, and expansion in the dynamic world of Web2 & Web3, crypto mining, and Decentralized Finance.

Phase 2

Business & Eco system (2025 Q1 – Q2)

- Bridge with opBNB, Polygon
- CMC, and CG listings.
- Global Marketing to reach eco-conscious investors and crypto enthusiasts, and Potential CEX listings
- dApp Launch - Interest Free Loans
- Build & Start Mining Operations.
- dApp Update : Launch Swap4Les
- Initiating community-focused campaigns to drive adoption of DeFi services

Phase 4

Integrations & Expansions (2026 Q1 – Q2)

- \$EBM Bridge for Cross/Multichain for increased user access
- Partnering with other key players in the blockchain and Gaming industry.
- Scaling up mining operations, adding hash power
- Include a diverse range of cryptocurrencies (like BlockDAG) to mining portfolio
- Enhancing ecosystem utilities through strategic partnerships and collaborations

Ongoing

Sustainability and Innovation (Ongoing)

- Continuously optimizing mining operations for efficiency and profitability.
- Exploring new technologies, trends, and opportunities in the crypto space for long-term value creation
- Engaging with the global welfare and community, driven projects for long-term value creation and sustainability.

Phase 1

Foundation (2024 Q3 – 2024 Q4)

- Establishing the core team and advisory board.
- Community benefiting business model and tokenomics
- Navigating UNGC, UN's SDGs and related global initiatives
- Smart contract Audits
- Private/Seed Sale
- Building early partnerships with DEX and CEX platforms to ensure liquidity and visibility
- \$EBM presale for community support and participation.
- Enable Token Trading

Phase 3

Infrastructure Development (2025 Q3 – Q4)

- Securing Permits & Building renewable energy plant
- Securing renewable energy certifications to build trust
- dApp Update : Launch Stake 4 More
- Activating engaging in the UNGC through operational involvement in the UN SDSN

Phase 5

Expansion and Growth (2026 Q3 – Q4)

- Securing sustainability partnerships for energy-efficient mining expansion
- Geographically diversifying mining operations to multiple countries or regions
- Establishing compliance frameworks with local governments in each region of expansion
- Potential EBM dApp to full scale DEX with Governance Tokens.

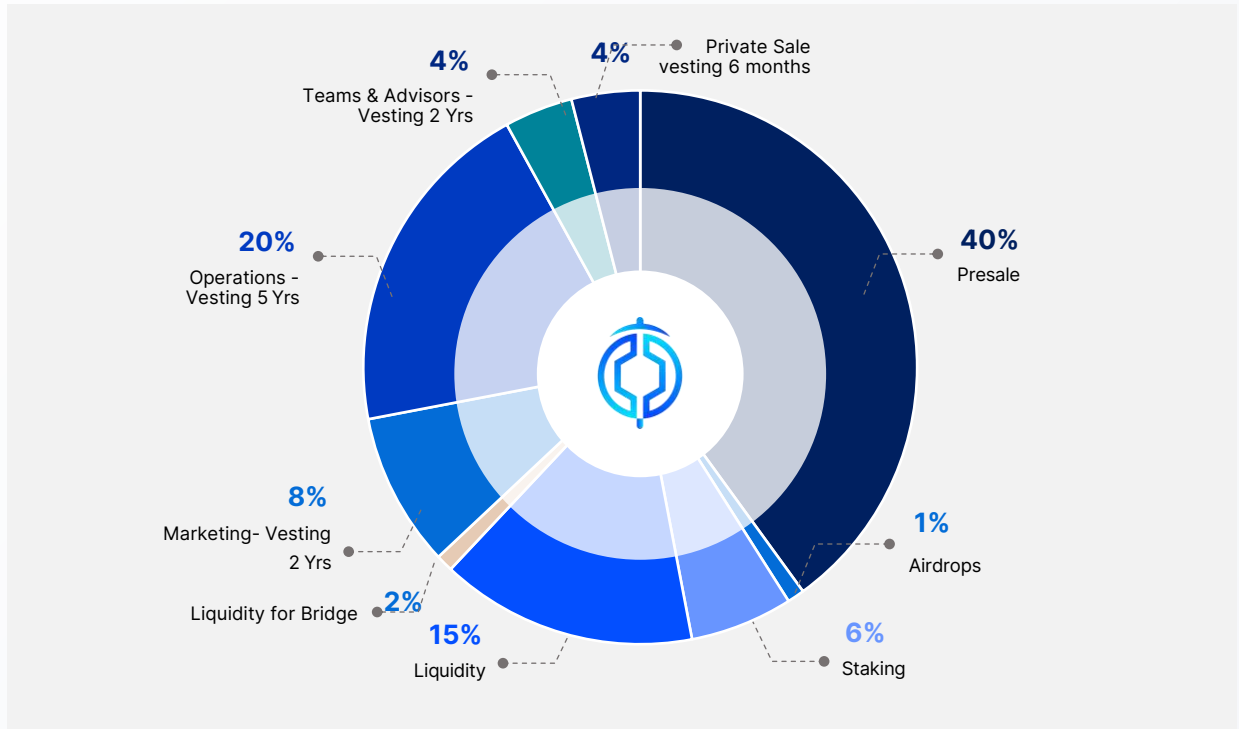

Our roadmap reflects our commitment to innovation, benefit communities, promote DeFi, and sustainability. Further guiding us towards our vision of promoting crypto mining reputation and supporting various welfare initiatives.

Tokenomics

With total Supply of 10 Billion \$EBM, we have designed our tokenomics model in a way that will create a resilient ecosystem which will encourage active involvement, compensate loyalists, and steer growth that is sustainable for the project boosting blockchains and growth of DeFi.

Private Sale: In this phase, there will be 40 % of tokens reserved for early seed investors who will be given preferential access to our tokens.

Presale: In this phase, there will be 40 % of tokens reserved for tiered presale purposes and early investors who will be given preferential access to our tokens.

Staking: 6% has been allocated as regular staking rewards to incentivize early investors even before we start our operations. Exclusive to presale participants.

Marketing: 8 % of total supply has been allocated for marketing activities with 10% at TGE and remaining 90% Linear Vested for 2 years.

Operations: 20 % of our initial supply has been allocated to our long-term operations with 1st Month Cliff and after that 100% at linear Vesting over 5 Years

Team & Advisors : 4 % has been allocated to our owners responsible for the operations and growth of business without quick access to the tokens i.e. 0% at TGE, 6 months Cliff, and 100% at Linear Vesting over 2 years.

Liquidity: Upon completion of presale the remaining 15 % will be added to liquidity pool at Decentralized Exchange (DEX).

Airdrops: 1% has been allocated for the future airdrops to community

Liquidity for Bridge / Cross chain operations: 2% has been locked in the EBM Token contract itself for the Bridge Role access to enable seamless cross chain transfers. Unsold and remaining will also be reallocated here.

Token Utilities

Payments: \$EBM can be used to access our ecosystem and pay at Swap4Less and other DEX offerings. \$EBM can be used as payment method at our partners' web3 integrated games and marketplaces

Discounts: \$EBM Token holders can swap USDT for currencies we mine at 1-10% discounted rate through **Swap4Less** based on their \$EBM holding levels. This ultimately boosts utility and value delivery of \$EBM tokens

Crypto Loans: With our first Decentralized Application (DApp), we plan to offer interest-free loans to \$EBM token holders. This innovative platform leverages smart contracts to ensure secure and transparent transactions. Instead of traditional interest, a fixed daily fee is applied, offering predictability and transparency.

Staking Rewards: Community can stake \$EBM tokens for higher discount levels and token rewards through our **Stake4More** program aligning their interests with the growth of this project.

Transparency

Our tokenomics shows how we value transparency, fairness, and value creation such that our tokens become invaluable assets within our ecosystem and beyond it

Through our exclusive staking option available only during the presale. This unique opportunity is designed to reward our early investors with significant bonuses and foster long-term growth for the EBM community.

Investing in ICOs involves risks, and it's crucial for investors to conduct thorough research and consider potential changes in the project's roadmap.
